

### VACANT POSITION FOR POSTDOCTORAL SCIENTIST

EPOS-Iasis, R&D, a Nicosia-based biotechnology SME accepts applications for the position of one (1) postdoctoral scientist for a Cyprus Research Promotion Foundation-funded program.

Candidates should hold a PhD degree in the field of Molecular and Cellular Biology, Biochemistry, Molecular Pharmacology, or Organic Synthetic Chemistry from an accredited higher education institution. A successful candidate is required to demonstrate expertise in modern tissue cultures techniques, immunohistochemistry, transfections and pharmacological screening with biosensors. Special skills in laboratory organisation and management as well as in preparation and editing of research proposals are expected. A very attractive salary is offered based on experience and expertise.

Applications from holders of a Master's degree will be considered only if the candidates have substantial experience in the areas described. The successful candidate will have the option to be appointed as a Research Associate at the University of Cyprus (non-salary position). The initial appointment will be for eighteen (18) months with the possibility for renewal for an additional two (2) years.

Interested candidates are requested to submit a curriculum vitae electronically ([inf@epos-iasis.com](mailto:inf@epos-iasis.com)) and have letters of recommendation sent by at least two (2) university professors from which confidential information about the candidate may be required. Letters of recommendation can be sent by e-mail but should also be mailed directly to EPOS-Iasis at the following address:

EPOS-Iasis, R&D
